What: Managing a Modern Supply Chain with Blocking and Tackling

Volatility in the U.S. supply chain has not been this great quite possibly since World War II. Being able to navigate the ever-changing supply landscape is more difficult than ever. But being adroit cannot mean forgetting about improving your core businesses and the underlying processes. We will discuss how these are being addressed at AMES:

- Dealing with commodity and tariff implications
- Driving results through the adaptation of tolerances to the various Supply Chain KPI metrics in S&OP and supply chain management
- Cpk in a culture that has not typically used it, namely China

Who: Mark d'Agostino

In his current role as Vice President, Global Supply Chain, AMES Companies, Mark is responsible for global purchasing, inventory management, production planning and transportation. Mark has held various positions in Supply chain management and has also spent time developing B2B standards on an international basis, which included managing a global standards process and facilitating the development of the Global Data Synchronization Network. Mark has worked for Black & Decker Corporation, BSH Home Appliances (a division of Bosch) and The Chamberlain Group. He has also worked 8 years in the automotive industry and 3 years in the consumer electronics industry. He holds a Bachelor of Science in Economics and Mechanical Engineering from Dartmouth College in New Hampshire and a Masters of Business Administration from Loyola College in Maryland
