January 2015 Chair's Message

As the pleasant aromas of New Year's pork and sauerkraut waft through the air, I pause look back over a successful year and prepare for a new one. ASQ 503 was a good host of many informative dinner meetings, plant tours, and the host of a booth at the Harrisburg Business Expo. We have a great slate of meeting topics already booked for 2015 so we can look forward to another year of good meetings.

With the end of 2014, we also had the end of terms for our Chair and Treasurer. I'd just like to thank Sally Haldeman for her terms as Chair and the work she did in serving our section. Big thanks also go to Greg Gurican as having served our section as the treasurer. Our section can't work without the behind the scenes efforts of people like this and these two have been very instrumental in our success.

Moving into 2015 we have a lot of opportunities in front of us to learn new viewpoints, see new places, and try new things. Remember, there is still an opportunity for you to join in on the leadership of the section as either the treasurer or the vice-chair.

Enjoy the remaining time off before going back to work...I'm going to have my pork and sauerkraut. See you at the next dinner meeting!

Brian Davis, Chair ASQ Section 503

What: The Darker Side of Social Networking- How Unintentional Information Leaks Can Affect Your Bottom Line

Many major corporations and industries spend large amounts of money in hardware, software and personnel protecting their computer systems from unauthorized access. However, even with adequate access control and IT protections in place it is often times the employees who are the weakest link regarding information security. Through mechanisms such as Social Networking, Spear Phishing, and Vishing many employees unwittingly release sensitive information that can seriously damage an organization and affect profitability.

The presentation, “The Darker Side of Social Networking” examines how these technologies are misused. It is a multimedia training that incorporates discussion, live demonstrations and actual case studies. It also emphasizes how an on-going educational campaign, highlighting these techniques and the risks associated with them, is essential to any corporate or government security plan.

Who: Jim Dill – IT IS, LLC

Jim is a Summa Cum Laude Graduate of the Indiana University of PA – BA Criminology – and was valedictorian of the Criminology Department. Jim has dedicated his entire law enforcement career to matters dealing with investigative technologies. He is a 30 year veteran of the PA Office of Attorney General (OAG) with 27 of those years served as an agent, supervisor, or director of the unit responsible for investigative technology and counter surveillance matters. Throughout his career Jim has participated in hundreds of investigations involving the use of investigative technology for the Attorney General as well as with a variety of federal, state, and local law enforcement agencies. He has been qualified and has testified as an expert on investigative technologies in both the Common Pleas and Appellate Court systems.

Jim currently serves as a subject matter expert and instructor for his own company (IT IS, LLC) as well as Alutiiq International and the Northeast Counterdrug Training Center. His “Darker Side of Technology” series has provided valuable insight and understanding on today’s technology to law enforcement, judges, businesses, victim advocate groups, educators and community organizations across the country.

Fred Hammond – Program Co-Chair
