What: Improved Quality Through Value Stream Management

Join Mike Roth of Go-Lean-Six Consulting to hear about an exciting eight-step method for creating and applying a systematic process for the implementation of lean. Value stream management is about more than just mapping your value stream and making a few improvements. A successful, sustainable lean initiative requires a process to manage the entire lean transformation. This discussion starts with an overview of value stream management and the basics of lean and considers mapping your current state, planning and mapping your future state, creating action plans for implementation and follow-through, and communicating the entire process.

Who: Mike Roth

Michael Roth is a Lean Six Sigma Master Black Belt with a Lean Manufacturing Certification from the University of Michigan. As CEO / President, Michael provides strategic leadership and "on site" mentoring for the Go-Lean-Six Consulting team. Michael has over thirty years of experience in the continuous improvement field with such world-class organizations as United Defense, York International, Johnson Controls, Harley-Davidson, Volvo Trucks and Mack Trucks.
